

## **Procedure for FOTA update of KaiOS software**

There are two ways to update the software:

Generally software update notification is sent to customer once every day.

### **Option 1**

- 1) Reboot the device and connect your device to active data connection via sim card or WIFI
- 2) Once the device is connected to active data services, the device will receive the notification
- 3) Click on notification button on top left part to access the update notification
- 4) Click on the notification and there will be a pop-up to download the software. Click ok to start download of the software.
- 5) After the download is finished the device will ask to update, click ok and update the software.
- 6) Once the update is finished the device will reboot.

### **Option 2**

If you've missed the notification, no problem, just follow the steps below:

- 1) Simply go to Settings -> Device -> Device information ->Software Update
  - 2) Verify that there would be new software available for download. Click ok to download
  - 3) After the download is finished the device will ask to update, click ok and update the software.
  - 4) After the update is finished the device will reboot.
-
